

David Ros Ferrer

Software Engineer | Full Stack Developer

STATEMENT

Hi, I'm David Ros, or simply Ros, a Software Engineer and Full Stack Developer with an insatiable passion for technology and creativity. Since my self-taught beginnings at the age of 11 in the world of programming, I've been immersed in the exciting journey of bringing ideas to life through lines of code. My unwavering curiosity has led me to explore and learn in the realm of web development, while combining my love for music, video games and film every step of the way.

WORK EXPERIENCE

Full Stack Developer • el pernile

Sep 2025 → Oct 2025 | Manresa, Spain (Remote)

National events company

- Responsibilities: Full stack development of a web platform with Next.js, TypeScript, and Supabase (PostgreSQL), implementing dynamic routes, API endpoints, and backend logic for data management and authentication. Design and development of modern and responsive interfaces, optimizing user experience (UX/UI) and accessibility. Efficient integration between frontend and backend, ensuring security, performance, and scalability. Implementation of technical SEO, web analytics, and data-driven experimentation to improve conversion and positioning. Collaboration on product architecture and continuous evolution.
